Warehouse Services Inc. provides technology solutions that deliver results in the areas of Safety, Quality and Return on Investment.

Our team of IT professionals supports operations throughout North America and is ready to respond to our clients and their operational needs. This team oversees the installation and development of the following packages, which are available to our clients.

- Warehouse Management System – Radio Frequency & Web Based
- Transportation Management System
- Transportation Operations Management
- Freight Tendering
- WEB Site Reporting
- Electronic Data Interchange
- RFID
- Global Positioning Systems

CUSTOM SOFTWARE SOLUTIONS

Our team can fully customize and integrate software to meet our clients' unique needs to provide solutions that enhance the operational effectiveness of our facilities. Our solutions provide clients with visibility and traceability of their orders from acceptance to delivery. As our clients' businesses grow and change, we continuously monitor the functionality of each implementation to ensure it matches the changing needs of the business. As opportunities to enhance the operations are identified, the IT team works with operations to modify and implement the improvements.
