

# TRANSPORTATION

Warehouse Services Inc. is a leading third-party logistics provider with customized value-added transportation solutions for clients of all shapes and sizes.

With a modern and reliable transportation fleet, highly trained drivers and advanced global positioning system solutions, we have the experience, capability and expertise to handle the most challenging transportation requirements.

Warehouse Services Inc. is an asset-based carrier offering more than \$110MM in transportation assets to serve our clients.

## TRANSPORTATION & DISTRIBUTION NETWORK:

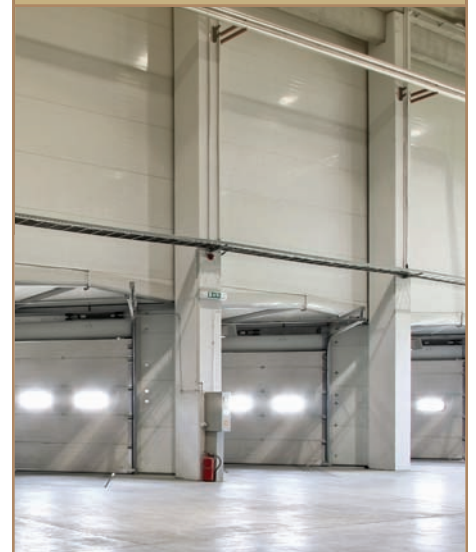

We operate in the continental United States and Canada, providing on-time deliveries to manufacturers, mass merchants, first and second tier automotive providers, as well as the retail marketplace.

### Our transportation team supports:

- Full Truckload
- Full Truckload Multi-Stop
- LTL
- Ocean Dray
- Dedicated
- Local
- Home Delivery
- Flatbed
- Bulk Transportation

Operating terminals located throughout the US support our fleet – comprised of more than 300 power units and 1,500 trailers. In addition, Warehouse Services Inc. has approximately 200 pneumatic dry bulk tankers to deliver various plastics and associated engineered polymers.

Warehouse Services Inc. also supports intermodal transportation, using pneumatic transfer to trans-load materials from trailer to railcar or railcar to trailer. Warehouse Services Inc. supplements our national coverage and operations with brokerage as needed.

# TRANSPORTATION

## CREATIVE TRANSPORTATION SOLUTIONS & TRANSPORTATION SERVICES PROVIDED INCLUDE:

**Truckload** | Warehouse Services Inc. provides TL transportation throughout the US including Intra-Canada. Services include: Dedicated models supporting delivery to major retailers and large manufacturers; regional deliveries to specific client's customer base; specialty equipment dedicated to customer lanes, and value added services such as home delivery and intermodal management.

**Brokerage** | Warehouse Services Inc.'s core capabilities include regional brokerage services with distinct clients. Brokerage capabilities include: flat bed, dry van, specialty dry bulk, and round trip container drayage. Warehouse Services Inc. continually searches for strategic partnerships to strengthen our brokerage coverage and provide the lowest cost of service.

**Transportation Management** | Warehouse Services Inc.'s transportation platform uses a TMS coupled with a global positioning system, enabling us to provide seamless integration with our clients' systems using EDI connectivity. We offer site-specific solutions for our clients, such as local dedicated shuttle services and on-site 24/7 spotter capabilities. We provide JIT transportation services for many of our clients in the automotive and building products industries. We also can integrate freight tendering as one aspect of a total TMS solution.
